

# Automate Your ASP-1

Optimize your O-ring Installation.

## Boost Your PROFITS!

### Struggling with labor shortages?

Upgrade your current ASP-1 machine to a robotic system and overcome the challenges of finding skilled employees. Automating your O-ring installation process ensures **consistent performance, reduces dependence on manual labor**, and keeps your production running smoothly.

### Looking to enhance productivity?

Our robotic upgrade ensures **precision, accuracy, and consistency**. Minimizing errors often caused by manual operations.

### Looking for a quick ROI?

Our SCARA robotic upgrade has the potential to **pay for itself in less than 1 year** through reduced labor costs. This upgrade not only enhances efficiency but also provides a long-term solution for maintaining productivity and improving your return on investment.

## Key Benefits

**Precise Automation:** Eliminate variability and errors in O-ring installation.

**Increased Throughput:** Reliable Production Uptime.

**Reduced Costs:** Decrease dependence on manual labor to cut operational costs.

**Easy Integration:** Engineered for seamless integration with your existing ASP-1 machine.

## Take the Next Step

Don't let labor shortages or inefficiencies hold you back. Automate your ASP-1 today and enjoy the benefits of precision, speed, and cost savings.

# Automate Your ASP-1

Transform Your Machine.  
Boost Your Productivity.

## The Upgrade:

### What It Is

It's a **SCARA Robotic Upgrade** that is ideal for high-speed, precise movement that is compact and efficient for streamlined installations.

### How It Works

**Consultation:** Our engineering team reviews your project requirements to determine the best solution for seamless integration.

**Customization:** We design and develop the feeder bowl, robot components, and escapement to fit your specific needs.

**Implementation:** Our team ensures a quick and efficient installation, minimizing production disruptions.

**Support:** We provide in-house training and ongoing assistance to ensure optimal performance of your upgraded system.

**IN O-RING  
INSTALLATION**

### Technical Information

- 24/7 Run Time
- 120V / 60HZ
- 60-90 psi
- Up to 20 ppm
- Keyence PLC & HMI
- O-Ring Presense
- Small Footprint
- Safety System
